

**In the Claims**

Please add new claims 31-37:

- Sub 3*
- A<sup>2</sup>*
31. (New) A web comprising the embedded particles formed by the method of claim 17.
32. (New) A web of claim 31, wherein the embedded particles are conductive.
33. (New) A web of claim 31, wherein the embedded particles are non-spherical.
34. (New) A web of claim 33, wherein the embedded particles are flakes, fibers, or grains.
35. (New) A web of claim 34, wherein the embedded particles are fibers.
36. (New) A web of claim 35, wherein the embedded particles are metal coated fibers.
37. (New) A web of claim 36, wherein the embedded particles are silver coated fibers.

**Remarks**

Claims 1-30 were pending in the above-identified application prior to entry of this Amendment. In this Amendment, claims 31-37 are newly submitted. Accordingly, after entry of this Amendment, claims 1-37 are pending in this case. Is it submitted that the amendments to the specification and newly submitted claims do not constitute the addition of new matter. Applicants have simply amended the specification to more clearly identify the products used in connection with the invention by their properties and physical characteristics in addition to their identification by trademark. Specifically, support for newly submitted claims 31-37 is listed in the Table below.

New Claim	Support
31	Pages 7-11, and Figures 12 and 13
32	Page 5, lines 18-20
33	Page 4, lines 25 and 26
34-37	Page 5, lines 10-12
